

**Tassomai is an adaptive software with powerful new AI features** providing **KS3 & KS4** students with essential knowledge practice in **science, English, maths, history, geography & computer science**. It ensures students embed and practise knowledge daily and gives teachers and school leaders rich data on engagement and activity.

The program has been used by hundreds of schools to **boost grades at GCSE and to close the attainment gap**. Tassomai's impact data shows that students of all abilities improve in their academic performance as they use Tassomai, but the effect is even stronger for learners with lower initial attainment.

Schools pay for access to the program annually, on a per-student basis. This price is based on how many full cohorts a school purchase for; a school buying for five cohorts pays **at most £5 per-student** and this covers two core subjects.

### Schools can trial Tassomai for free for 3 weeks.

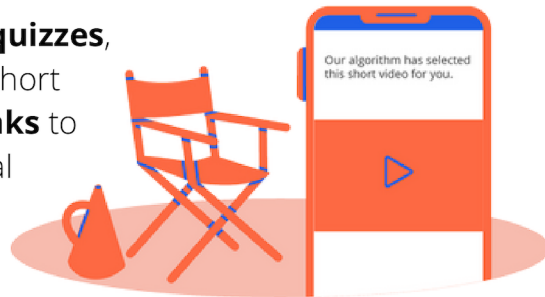

The first step is to arrange a demo via the Tassomai website at [www.tassomai.com/teachers](http://www.tassomai.com/teachers), or email [mark@tassomai.com](mailto:mark@tassomai.com). It's quick and easy to get set up and all schools are provided with comprehensive onboarding resources as well as ongoing customer support to help teachers use the program effectively.

*"We have now subscribed to Tassomai for several years and have seen **such a dramatic difference in our pupils** that our GCSE results last year were some of the best we have ever had."*

Holly Bradshaw - Science Teacher, Marple Hall School

Tassomai helps students achieve mastery through **retrieval practice**, incorporating techniques like **interleaving** and **spacing**, and applying methodology from sports and music coaching.

As well as personalised **quizzes**, Tassomai also includes short explainer **videos** and **links** to carefully curated external resources.

Parental engagement is integral to our platform. Schools can activate **weekly progress reports for parents** and, via their **parent dashboards** they can access powerful tools like the Tree, where they can watch knowledge and understanding grow.

A student's **Tree** grows as they answer quizzes on Tassomai. It's an intuitive, interactive tool that makes it easy to see which topics a student understands and where they need help.

Tassomai is leading the way in **award-winning, evidence-based EdTech** and we are proud to have been recognised for our achievements.
