

# A WHOLE NEW EXPERIENCE

Coming to your school this autumn, Discovery Education Experience is our brand-new platform for delivering your Discovery Education Espresso service. Bringing a fresh new look and the tools you've been asking us for, Discovery Education Experience brings together our high-quality digital content and professional learning resources into a unique creation and collaboration space with everything you need to create an enriching experience wherever the learning is taking place.

- Customise how your Discovery Education content is organised to be specific to your individual needs
- Share and assign lessons or resources to classes or individual pupils
- Intuitively create quizzes and creative learning tasks
- Seamlessly deliver lessons whether pupils are in person or online
- Learn powerful new ways to use digital resources effectively in your classroom

As a Discovery Education Espresso subscriber, your school will be able to enjoy all the benefits of Discovery Education Experience as part of your existing subscription at no extra cost.

We'll be in touch to plan your upgrade but if you can't wait to get started or have any questions contact us today on 0800 652 7527 or [schoolsupport@discoveryed.com](mailto:schoolsupport@discoveryed.com)

# Experience a world of educational possibilities

1

## Discover powerful learning resources

Espresso's high-quality learning resources are now grouped into resource collections called 'channels'. Channels feature all the content you know and love such as Phonics, Vikings, and Online safety as well as some new skills-based channels including Creative writing, Find maths everywhere and Is there anybody out there?.

2

## Create, collaborate and present

Experience includes Studio, a flexible tool for both teachers and pupils. Teachers can create lessons and presentations combining resources from Discovery Education with their own materials. Pupils can create boards to demonstrate their understanding, which teachers are able to view and assess.

3

## Personalise your space

With Discovery Education Experience you can find content, and return to it, much more easily. Channels can be pinned to your homepage helping you easily access your most frequently used resources or upcoming topics for the term. When browsing you can add individual resources to your 'quicklist' for easy retrieval, or save to your 'My content' area which can be organised by class, term or topic.

4

## Learn new ways to use digital content

Access support every step of the way with a variety of resources highlighting digital content best practice. The 'What works well' section brings together a selection of materials created by educational practitioners to help you get the very best out of digital resources whether you're teaching in-person or remotely. You'll also find our popular SOS instructional strategies: creative, research-based strategies created by teachers to help you incorporate digital media in meaningful, effective and practical ways.

5

## Create and assign quizzes

An oft-requested feature, you can now combine your Discovery Education Espresso content with self-created multiple-choice quizzes to provide a quick, informal way of checking pupils' knowledge. Quizzes can be assigned to individual pupils or the whole class and as a teacher you receive clear data around pupils' understanding of the topic you're teaching.

6

## Save time finding resources

With thousands of resources on Espresso, it's important you can quickly find what you're looking for. A new more visual search function makes it clearer what resources are available whether you're looking for a topic or an individual resource. Use the filter to narrow down even further by resource type or key stage.

7

## Support blended learning

If pupils are unable to attend school for any reason, you can easily transition to remote learning with Discovery Education Experience. With all teachers and pupils having unique logins pupils can continue to access the lessons they have been assigned or search for materials to supplement their learning. Teachers can view the work pupils are submitting and easily see where pupils may need some additional support. Parents can be confident that their children are learning in a safe, secure environment.

8

## Assign resources to pupils

With Classrooms, you can quickly and easily assign specific resources to individual pupils, groups or your whole class. This makes it easy to personalise the learning experience and helps you keep track of what pupils have done and when a pupil needs extra support or challenge.

## Have any questions? Contact us to discuss.
