FlashAcademy®

Digital English language proficiency assessment

FlashAcademy® is the first company to offer an AI-assisted marking tool for EAL assessment. Based on the A-E grading framework recommended by the Department for Education, it automates the marking of both receptive and productive skills.

This provides:

- **Consistent and accurate assessment:** Ensures standardised English language proficiency testing, removing the challenges of subjective marking and inconsistent data
- **AI-driven accuracy:** Tracks all language skills across your EAL students' journey, with 100% consistency in marking
- **Actionable insights:** Benchmarks progress and highlights areas for development
- **Student-first outcomes:** Detailed reports empower teaching strategies, parental engagement, and continuous student support
- **Teacher-friendly dashboard:** Makes monitoring and administration simple at class and whole-school level

Q. What sports do you like and dislike?

A. 'basketball'

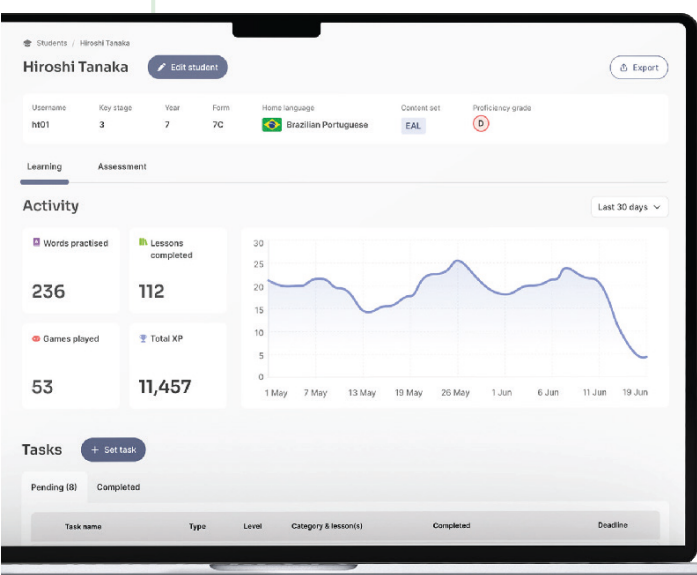

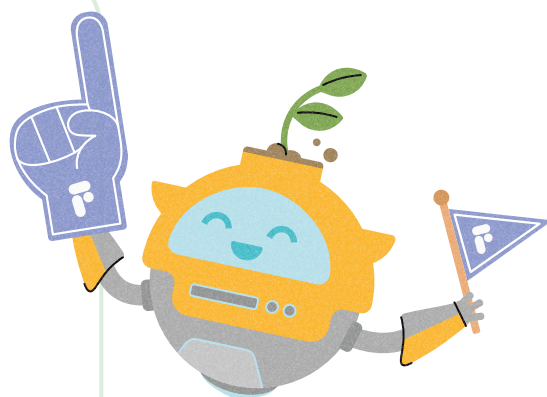

AI review: The user mentioned 'basketball' in response to the question about sports they like or dislike. However, the response does not address both likes and dislikes.

Data-driven insights and progress monitoring

Using **FlashAcademy®** creates a standardised approach to EAL assessment and progress tracking. The platform provides comparable data across classes and schools, identifying what works best and where extra support is needed for EAL learners.

Data highlights include:

- **Actionable insights:** Data points that inform strategic planning and interventions
- **Targeted EAL strategies:** Identifies trends and key development areas
- **Detailed performance data:** Tracks grade distribution, lessons completed and assessment completion times
- **Progress correlation:** Examines how lesson completion links to English language proficiency outcomes
- **Easy reporting:** Exportable PDF and CSV files for parents and carers, SLT and inspectors

Demonstrating impact

FlashAcademy® makes it easy to show the impact of your EAL assessment strategy through clear visual data. Schools can demonstrate measurable improvements in English language proficiency across cohorts.

Impact measures include:

- **Completed EAL assessments:** Show clear evidence for school inspections
- **Assessment status:** Assessments set, completed and marked
- **Grade distribution:** A clear view of group progress
- **Average completion time:** By grade band

Efficiency and reduced teacher workload

FlashAcademy®'s AI-assisted marking significantly reduces the time teachers spend on marking EAL assessments. Traditional paper-based assessments can take 45-60 minutes per student. With AI-assisted marking, teachers only need to confirm or amend the grade, freeing an average of 150 hours per year for valuable teaching time.

Targeted learning and subject specific vocabulary

FlashAcademy® helps EAL learners build strong vocabulary and core English language skills through engaging, interactive lessons. Students develop their grammar, pronunciation, spelling, scaffolding, reading, handwriting, phonics, fluency and idioms, developing both BICS and CALP vocabulary. Gamified learning keeps motivation high, encouraging EAL learners to take ownership of their progress.

Independent learning

Available across iOS, Android and PC as well as offline mode, FlashAcademy® supports EAL learners in developing English language skills independently, with the option to learn from their home language. Available in 48 home languages, this supports additional language learning by building on your EAL students' existing language acquisition for faster progress and improved confidence – and smoother integration.

Data shows a strong correlation between regular app engagement and improvement in EAL proficiency grades. By encouraging short, consistent practice sessions, FlashAcademy® helps students build confidence and achieve their full potential.

FlashAcademy®'s unique combination of accurate, AI-assisted marking, powerful insights, exportable reports and engaging learning tools helps schools support every EAL learner to unlock their potential.
