Secure Platform to Support Your GDPR Strategy

Record from a Camera or Capture Your Screen

Planet eStream provides a secure central media platform that incudes key tools for educators to create and share learning resources...

Interactive Video and Quiz Tools

Turn passive viewing into active learning by making videos interactive. Educators can easily add questions, hot spots, annotations and links to additional assets. They can also analyse the results and track students viewing patterns and progress.

Editing Tools to Create Streamlined Resources

Create chapters or cut together clips from multiple videos. The Video Editor also adds custom audio tracks and titles, and you can record commentary on the fly with the built-in voice over tool.

Record from a Camera or Capture Your Screen

The built-in Web Recorder enables users to capture their desktop to create recordings – great for providing video-based feedback or guided learning. Users can also record from cameras such as webcams, providing a simple solution for classroom capture.

Simple Share Options

Built-in share links and embed codes enable easy distribution of recordings and resources.

Integrations with Learning Platforms

Our bespoke plugins for supported VLEs enable educators to easily embed their Planet eStream resources within their chosen VLE. These plugins also provide direct access to schedule TV and radio recordings or request content from the Planet eStream Connect Archive.

Freeview TV Sharing

Planet eStream also provides a built-in creative toolset. This enables educators to turn TV and radio programmes into streamlined learning resources, to support their teaching and increase student engagement.

Turn Programmes into Interactive Quizzes

Turn passive viewing into active learning by making TV programmes interactive. Educators can easily add questions, hot spots, annotations and links to additional assets. They can also analyse the results of quizzes and track students' viewing patterns and progress.
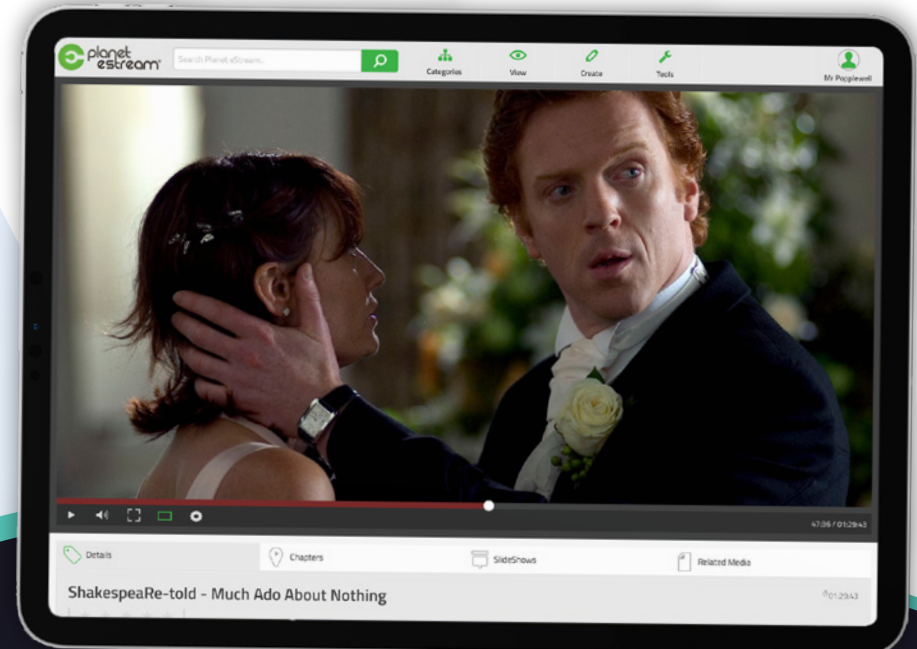

Edit Your Programmes

Easily create chapters to break up recordings into relevant and easily digestible sections. There is also access to a built-in video editor, enabling users to trim recordings or cut together clips from multiple programmes into one resource

Simple Share Options

Built-in share links and embed codes enable educators to easily distribute recordings and resources to students.

Integrations with Learning Platforms

Our bespoke plugins for supported VLEs enable educators to easily embed their recorded programmes and resources within their chosen VLE pages. These plugins also provide educators with direct access the TV and Radio Recorder and the Planet eStream Connect Archive, enabling them to request and embed new recordings from within their VLE easily.

Digital Signage

Planet eStream Digital Signage is a flexible, scalable and easy to use digital signage platform. The simple drag-and-drop interface makes creating screen designs easy, enabling users to bring multiple media types together in one screen design. Sophisticated administrative tools are available from anywhere, streamlining the management of the digital signage screens and reducing the workload for IT and marketing teams.

Planet eStream delivers a true digital signage experience and is a perfect fit for an educational environment, featuring...

Unlimited Screen Licence

The Planet eStream licensing model is not based on the number of displays you are running; it is completely unlimited! This offers a flexible and cost-effective model for organisations to easily expand their digital signage provision.

Advanced Scheduling

Plan ahead by creating either ad-hoc or recurring schedules. There is no limitation on how far in the future you can schedule content, enabling IT and marketing departments to deploy their signage content well in advance.

Advanced Content Management

Advanced, centralised digital asset management system enabling users to create, edit and organise digital signage assets centrally.

Secure and Seamless User Access

Integrate directly with your authentication system for both simplicity and security, removing the requirement to manually set up user accounts.

Structured User Access

Granular permissions enable you to control the level of access that different users have to the platform, including specific screens, sections of screens, messages and schedules.

Photo Library

Planet eStream offers a complete digital asset management solution for your organisation. With advanced photo management tools, it is perfect for securely storing, managing and sharing your digital images from one central platform.

Planet eStream provides a simple and flexible workflow for archiving, editing and distributing images. This enables educational organisations to create a secure organised photo library that assists with GDPR compliance.

Galleries
Choose from different display methods for your photos, including swipe, scattered and slideshow options.

Import Tool
An automated batch importer for your existing photo archive. During import, tags will be generated based on the imported folder structure, providing continuity for users.
Simple Upload for Users
Users can add new images easily via the simple drag-and-drop interface. When uploading, users can choose to create a new Collection or add new images to pre-existing Collections.

Embedding and Direct Integrations
Share and embed Galleries into websites and other platforms using built-in share links, embed codes and bespoke plugins.

Crop and Rotate
Built-in automatic image rotation and manual tools enabling users to manually crop and rotate images.

Live Streaming

Live streaming is more popular than ever before with people ready to watch from almost any location. Planet eStream makes live streaming easy, enabling educational organisations to start live broadcasting without complex technical processes or expensive hardware. There are also built-in capture tools, delivering a cost-effective solution for lesson and lecture capture applications.

● REC

● REC

Planet eStream provides the tools that make live streaming and recording a simple and flexible technology for educational organisations to stream their content securely...

Stream from Anywhere
Stream from any location using your Planet eStream platform - all you require is an internet connection.

Multiple Sources
Stream two sources simultaneously as a picture-in-picture stream. A great example is lecture capture whereby you can stream both the presenter and their presentation at the same time

Stream from your Mobile Devices
The Planet eStream iOS application enables users to record or broadcast live from their mobile devices.

Screen Capture
Built-in screen recording to capture your desktop or application window as a video source.
No Bespoke Hardware
Take advantage of cost-effective hardware; Planet eStream's Live Encoder works with most Windows compatible hardware capture devices.

IP Input for Lesson and Lecture Capture
Planet eStream can also pick up IP video feeds as a source. This enables you to set up live streams using IP cameras installed in your rooms, making a very discreet observation system.

View from any Device
You can access live streams from anywhere and from any device. As you have full control over the Planet eStream platform you can control who the streams are available to.

Going Live in 3,2,1...
