Oxford's maths courses – powered by MyMaths

MyMaths is the perfect complement to any secondary maths course you're using. But only Oxford's courses come with direct links from each topic to the matching lesson and homework in MyMaths, helping you and your students get the most from all your resources.

“ A complete and easy to use homework solution for maths teachers.
David Disau, Educational Consultant ”

Our linked courses have schemes of work to support you across a 5 or 7 year curriculum

Key Stage 3

Key Stage 4

Key Stage 5

Lessons

Our interactive lessons break down and illustrate key concepts to offer students a rich source of support.

Students can access lessons from home, making them great for independent study and revision for GCSE, A level or end of year exams.

In addition to being a great resource for students, the lessons offer a wealth of tools and activities that you can incorporate in your lessons for great front-of-class teaching.

“ The subscription represents incredible value for money. MyMaths helps us maintain our 70% plus success rate for GCSE resit.

MyMaths customer,
Sixth Form Academy

Homework

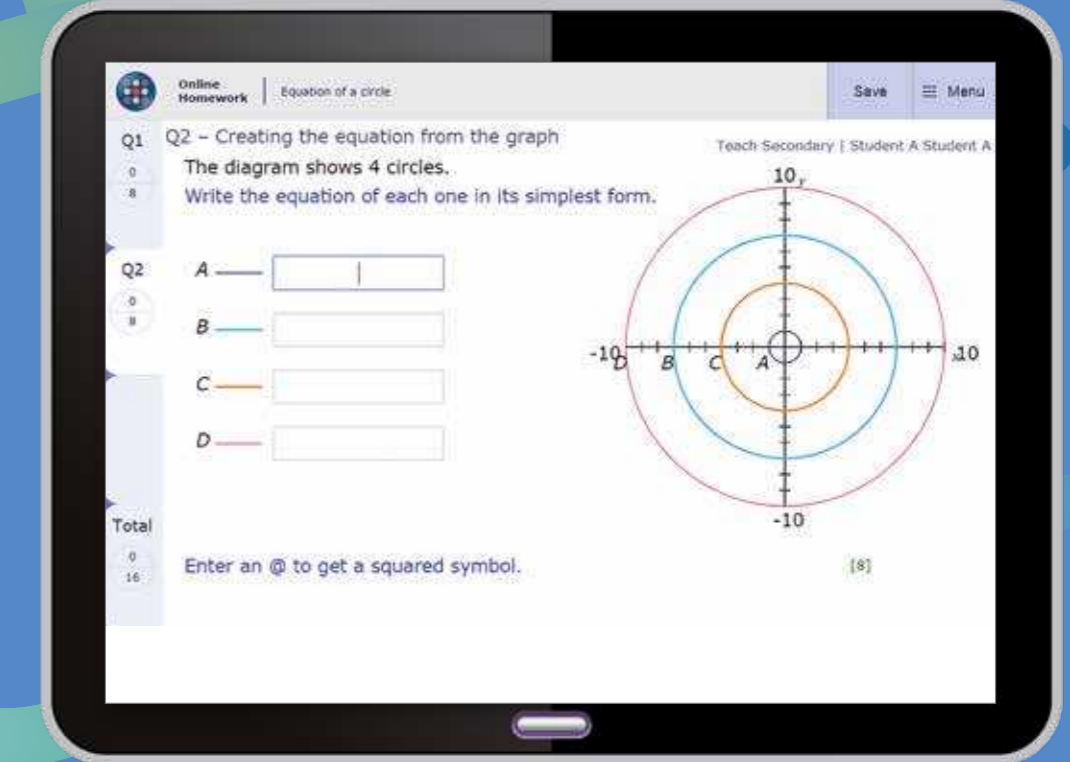

Every lesson is paired with a homework task to assess understanding. Randomly generated questions provide students with plenty of opportunities to master their skills or revisit a topic during revision.

Time saving

Our Impact Study has proven that teachers save time when using MyMaths, whether that is when planning, setting or marking homework.

On average teachers can save two hours a week by using MyMaths, with the most significant time saved on homework setting and marking.

Read the Impact Study summary at www.mymaths.co.uk.

“ I have not come across any other maths homework system where students would voluntarily come in at lunchtime.
