

CASE STUDY #1

This 2018 study focused on **630 children** between the ages of **7-13 years old**, gathering data from 22 different schools over a 5 week period.

It tested the children on their spelling of **25 different words** of varying difficulty before and after using the Sir Linkalot App. The children were tested initially, then viewed the spelling animations and were subsequently tested one month later **without viewing them again**.

ALL CHILDREN: AVERAGE SCORES

LOW SCORING CHILDREN (INITIALLY SCORING BELOW 10): AVERAGE SCORES
