

CASE STUDY #2

This 2019 study focused on **450 children** between the ages of **7-11 years old** (inc 141 SEN & PP), gathering data from 12 different schools over a 5 week period. It tested the children on their spelling of **25 different words** of varying difficulty before and after using the Sir Linkalot App. The children were tested initially, then viewed the spelling animations and were subsequently tested one month later **without viewing them again**.

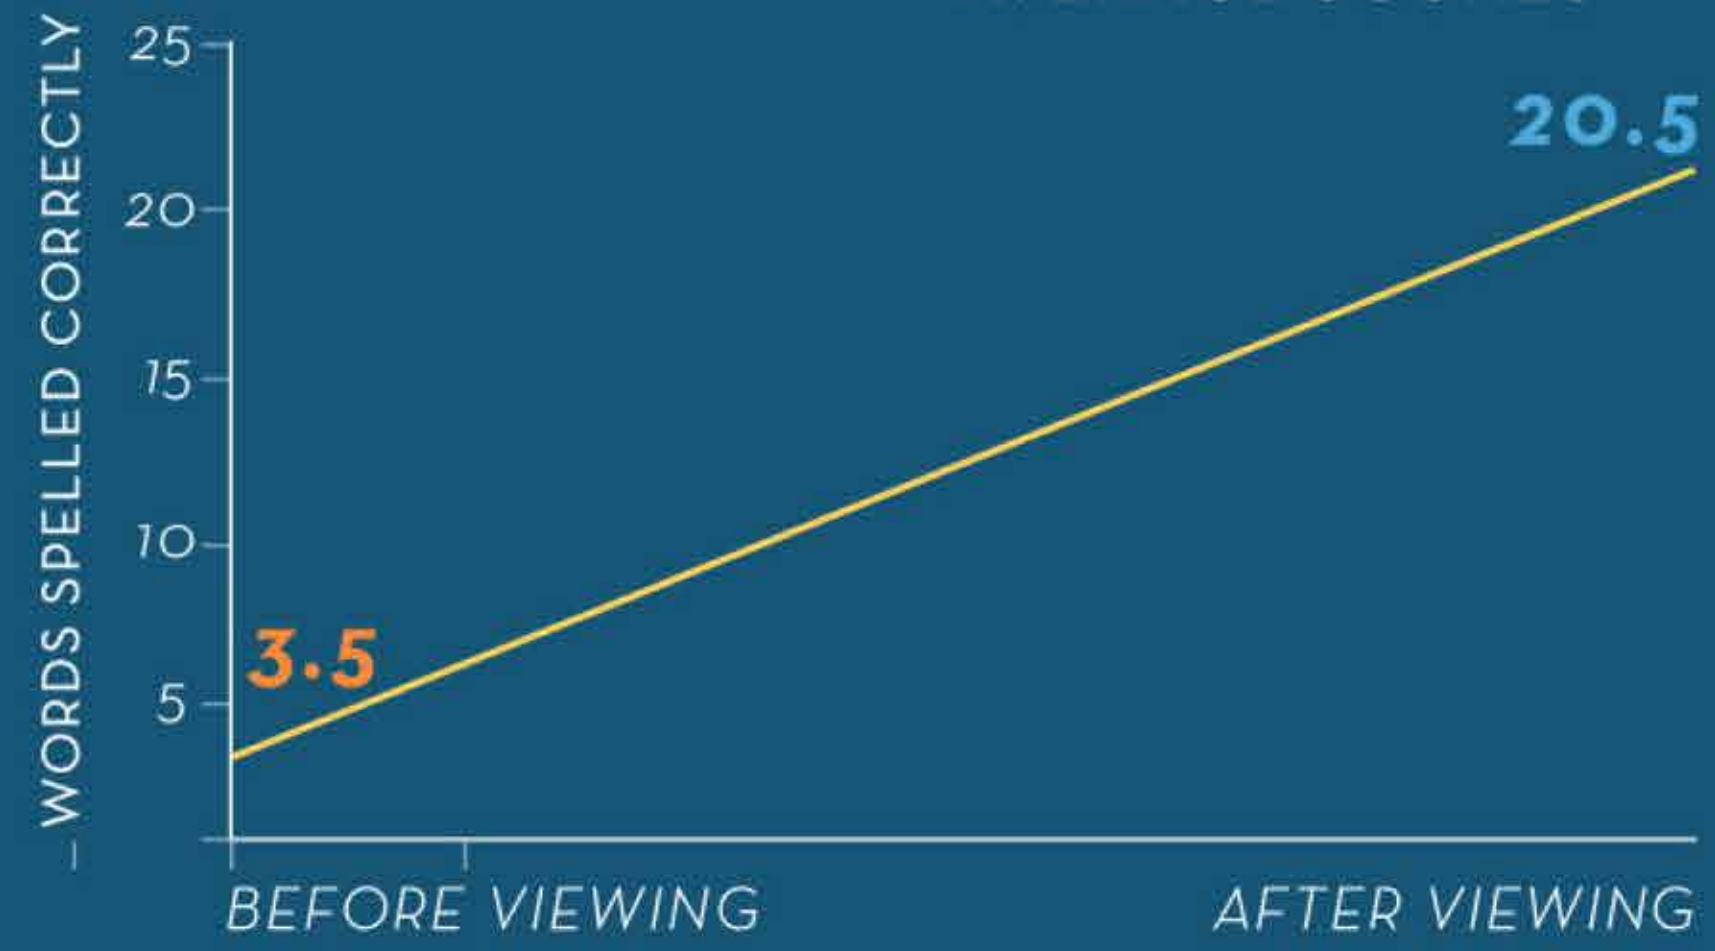

**ALL CHILDREN:
AVERAGE SCORES**

**SEN AND PP CHILDREN:
AVERAGE SCORES**

**10 WEAK SPELLERS*:
AVERAGE SCORES**

*Case study of 10 SEN children at one school
