CASE STUDY #3

West Leigh Junior School

This 2020 study focused on **440 children** between the ages of **7-11 years old**, gathering data from West Leigh Junior school over a 5 week period. It tested the children on their spelling of **20 very difficult words** both before and after using the Sir Linkalot App. The children were tested initially, then asked to view the spelling animations and were subsequently tested **one month later without viewing them again**.

“It is a genuine thrill to see the children, many of whom have struggled with spelling previously, achieve success whilst also having fun. I cannot recommend the App highly enough.”

John Lear, Headteacher, West Leigh Junior School, Essex.
