Sentry™

For Safer Recruitment

Single Central Record Software to Support and Guide your Safer Recruitment Processes

Sentry

For Safer Recruitment

Sentry is a safeguarding software tool that effectively manages your safer recruitment process and acts as your Single Central Record. It enables practitioners to easily record all recruitment checks that are required by the statutory guidance and to closely track every step of that process. The system has been designed to guide you through the recruitment process, to monitor the progress of outstanding checks and to ensure compliance with the relevant legislation.

Sentry will ensure that your recruitment processes are robust and acts as a critical first line of defence against those individuals who may present significant risks to children and young people.

Effective Safeguarding Starts with Safer Recruitment

The guidance on Safer Recruitment and the management of the Single Central Record is very detailed and can be very complex to follow. Practitioners find it challenging to keep up to date with the guidance and managing these critical safeguarding processes on paper is no longer efficient or effective.

Sentry for Safer Recruitment provides an easy to follow workflow for all of the critical recruitment checks that schools need to complete before appointing someone as a member of staff, volunteer or school governor. The system has been designed to support and guide users through each of the recruitment steps and leaves nothing to chance; effectively users become 'unconsciously competent' by simply following the Sentry workflow.

This approach is under-pinned by our comprehensive safeguarding knowledge and expertise ensuring that the system has been designed to put the protection of children and young people first.

Key Features of Sentry

Sentry guides your organisation through its Safer Recruitment process and enables peace of mind that your practices are compliant.

- Quick reference dashboards to easily monitor status and outstanding SCR recruitment checks
- Automated workflows throughout the system to ensure no critical steps are missed
- Provides users with up-to-date guidance and advice on relevant guidance and best practice

Benefits of using Sentry for Safer Recruitment

Step by step guided workflows through the safer recruitment process and the monitoring of recruitment checks for all staff

Minimises risk and facilitates joined up safeguarding, whilst fully complying with Government guidance and legislation (including KCSIE 2020 and Keeping Learners Safe In Education)

Saves significant time and makes the safer recruitment process more robust

Information Security

Sentry is hosted within the same UK-based data centres as MyConcern and benefits from the very high levels of security that we apply to all of our systems and processes.

- GDPR compliant
- Registered with the Information Commissioner's Office
- Complies with the Data Protection Act
- Cyber Essential Plus accredited
- ISO27001 certified
- Two-Factor Authentication enabled

Our information security and GDPR Compliance statements detail our information security and data protection arrangements.

These are available at:
www.myconcern.co.uk/information-security-myconcern

GDPR   ISO 9001   ISO 27001   CYBER ESSENTIALS PLUS

Custom Roles

Create customisable personnel roles within your establishment that are tailored to your needs and define any checks or evidence required for these roles on a case-by-case basis.

Custom Checks

Create your own customised checks that your establishment require for both standard personnel roles and customised personnel roles.

Expiry Dates

Specify when a customised check can expire and be notified when they are due to expire. View expired checks and those that are due to expire within the next 30, 60 or 90 days.

FAQs

Is my data secure in Sentry?

Yes. Data is stored securely in resilient DfE approved data centres in the UK. We are ISO 27001 Information Security Management certified and Cyber Essentials Plus accredited. Sentry uses two factor authentication and secure encrypted data transmission using SSL/TLS. We are GDPR ready, DfE Cloud Services compliant and registered with the UK Information Commissioner.

How do I upload my existing SCR data?

A feature is available within Sentry to enable data relating to individual's profiles to be uploaded via an import file. We do not currently provide functionality to allow other SCR related data to be uploaded. As part of the on-boarding process, One Team Logic will work closely with customers to provide help and support in the formatting of their existing SCR data for upload into Sentry.
