SCHOOL

Introduction to the school

The Alpha Schools is a small British primary school located in Al Qusais, Dubai, following the English National Curriculum and have around 200 students on roll. The school are in the process of changing our MIS system and have been using Learning Ladders for around 6 months.

“Learning Ladders was a breath of fresh air. The whole process from signing-up, setting up the system, training our staff and implementing it within our school was so easy and we were supported every step of the way.”

Craig Evans
Deputy Head of Primary

SCHOOL

Our journey to success

At Alpha School, we wanted an assessment system that gave us a range of tools, so we can accurately modify our curriculum to personalise the children’s learning journey, whilst reducing our teacher’s workload

We also wanted a system that enabled us to track children in both the English National Curriculum and MOE Curriculum Framework subjects. In addition to this, we wanted a system that was user-friendly, quick and efficient, and provided parents with the opportunity to receive regular updates with regards to their child’s attainment and progress across the curriculum.

We also wanted a system that would provide, quick and accurate results that were easy to analyse for all stakeholders.

We were looking for a system that: was easy-to-use and speedy; provided clear reports of children’s strengths and areas of development; and incorporated all the subjects taught, including the MOE curriculum framework subjects.

Our challenge was to have a concise system that provided class teachers with easy to understand data analysis. We also wanted to ensure that all subjects could be contained within one system to ensure efficiency and consistency across the school.

“In comparison to our previous system, Learning Ladders is outstanding”.

How Learning Ladders helps our school

“I think Learning Ladders has set our teachers free to teach without assessment being an additional burden.”

Learning Ladders was a breath of fresh air. The whole process from signing-up, setting up the system, training our staff and implementing it within our school was so easy and we were supported every step of the way. In comparison to our previous system, Learning Ladders is outstanding. All the analysis tools, including the excellent GAP Analysis, the speed of system and the ease of use for class teachers, make Learning Ladders by far the best system we have ever used at Alpha School.

The biggest benefit was the GAP analysis tool in enabling heads of departments and class teachers to carefully analyse individual needs and strengths. From this, we have been able to carefully modify the curriculum, and this has had a huge impact on the number of children achieving better than expected progress.

Another huge benefit for our school was the opportunity to personalise the curriculum ladders for different subjects. This enabled us to break down objectives into smaller steps. This was particularly helpful for our SEN department so children and parents could see their progress more clearly.

SCHOOL

“ Parent communication – Learning Ladders provides with regular updates on their child’s attainment and next steps.”

“Parent communication – Learning Ladders provides parents with regular updates on their child’s attainment and next steps. Our parent community are responding well to this and it has enabled parents to know every step of their child’s learning journey”.

“Learning Ladders is excellent value for money. Not only does it provide us with excellent tracking and analysis tools, the speed of the system means our teachers can spend longer on using the analysis to focus their teaching and accelerate the progress of all the children.

The Learning Ladders team have supported us throughout our time and continue to whenever we require guidance. They are immediately available, and this makes us feel secure and supported. The support on offer is amazing value for money in itself.”

SCHOOL

The Impact of using Learning Ladders.

Learning Ladders has had a huge impact on all stakeholders within our school community.

Learning Ladders has empowered our staff to have the confidence when assessing their children and planning their lessons. The analysis tools available, have provided class teachers with a clear understanding of the children's strengths and areas of development. This has allowed us to carefully modify our curriculum, so the learning of each child is personalised. This has accelerated the progress of all children across the school.

Learning Ladders has also brought many different sections within our school together. The incorporation of Arabic, Islamic, UAE Social Studies and Moral Education enables us to have consistency across our school and provides an excellent platform for all staff to collaborate and moderate together across subjects.

Register and implement it as soon as possible, it is simply outstanding and has transformed our school. You are supported every-step of the way to ensure that the system is carefully tailored to your school's needs. SLT members and teaching staff will love it!
