

GOOGLE CLASSROOM INTEGRATION

How has Senso improved your classroom management?

“Senso rapidly became the cornerstone of our technological approach to teaching and learning. The integrations with Google Classroom made it the perfect ally for keeping an eye on student productivity, allowing us to see when students strayed off task. For the administration and support side of the school, Senso was the lifeline that allowed our IT department to screenshare and resolve technical issues.”

A POWERFUL TOOL

How has the implementation of Senso benefited your school?

“While the pandemic has passed, and we welcome students and staff members back to school, Senso has remained a powerful tool in our software toolbox.

We now use this fantastic application to monitor productivity, share screens and ideas, manage our power consumption by shutting down PCs overnight, and also proving to be an invaluable asset for safeguarding monitoring – the results of this service in particular having made a real difference to the detection of pastoral and safeguarding issues, allowing for effective interventions very early on.”

VALUABLE SOFTWARE COMPONENT

How has Senso helped?

“Here at Leighton Park School, Senso is a valuable software component that touches every area of school life – from maintaining excellent teaching and learning practices no matter the distance, to ensuring that we can easily detect pastoral and safeguarding concerns, there is always an element of this application that plays a vital role.”
